

# Moldex: The Miner's Mate

## HandyStrap® Series

### DURA-MESH® SHELL LASTS LONGER

Our 2700P2 has been an industry standard for years, now we offer our new black Dura-Mesh® shell that protects the filter media and hides dirt, keeping the mask cleaner looking longer. Plus it resists collapsing, even in heat and humidity. So the respirator holds its shape longer. The result is fewer respirators used and lower costs.

### HANGS LOOSE

HandyStrap® allows mask to conveniently hang around the user's neck. So it's always ready for use. And during wear the adjustable stretch cloth strap is cooler and more comfortable.

### VENT HOT AIR, STAY COOLER

Exclusive Ventex® valve lets the hot air out faster. So breathing resistance is reduced and workers stay cooler.

### P2 WELDING PROTECTOR

Added carbon layer for 2800P2 helps relieve miners of nuisance levels of ozone and organic vapour odours.

Australian standards approved for fumes, dusts and mists. Meets heat and flame resistance in accordance with AS/NZS 1716:2003 resistance to flame test.
