Moldex's expertise is hearing and respiratory protection to keep workers safer. This laser like focus results in an offering of innovative world class products.  
- Our core products are manufactured in the U.S.A.  
- Moldex is specialized in an age of generalization.

With over 50 patents, Moldex® is dedicated to developing innovative solutions that address the hearing and respiratory needs of industrial and healthcare employees.

Some of our industry leading solutions include:

The unique contoured shape of Meteors® follows the curves of the ear canal to create exceptional all-day comfort while still providing serious protection.

Dura-Mesh® provides bi-directional protection from dirt on the outside and moisture on the inside resulting in masks lasting longer, reducing usage and saving money.

Glide’s unique multi-curved stem custom fits, with just a push and a twist.

Pocket-Paks® and EcoStations® re-usable products.

An air pocket in the tip of our Rockets® reusable earplugs provides incomparable comfort.

HandyStrap® and SmartStrap® masks can be conveniently stored around the neck while on a break, keeping them from getting prematurely thrown away or misplaced.

The first disposable earplug dispenser. PlugStations® hang anywhere earplugs are needed to increase compliance and reduce waste.

The first corded earplug dispenser. Moldex now offers a PlugStation to those that require a corded earplug.

The refillable and recyclable EcoStation is easy on the hearing protection budget and easy on the environment.

All Moldex products and packaging are PVC-Free. A scientific study by Nicholas Anastas, Ph.D. Principal, Poseidon’s Trident LLC, and Matthew Eckelman, Ph.D. at Yale University, Center for Industrial Ecology, confirms that considering the full life cycle of PVC vs. Polyurethane and Polypropylene, the scientific data supports the conclusion that use of Polyurethane or polypropylene are “green” alternatives to PVC and are ecologically preferred. Toxic chemicals associated with PVC disposal have been linked to a variety of health hazards.

Moldex has taken a leadership position among global PPE manufacturers in minimizing our environmental impact. We began with the complete elimination of PVC which is linked to one of the most environmentally toxic materials in landfill disposal and this initiative has now grown into a corporate culture that constantly looks to manufacture innovative products that minimize environmental impact.

Green products and packaging

- Removal of all PVC from our products and packaging.
- Dura-Mesh shell on disposable respirators allows fewer respirators to be used and a reduction in the waste stream.
- Respirator Lockers® EcoStations and Pocket-Paks® are recyclable products.
- Use of recycled paper for all literature and packaging throughout the company.

DISPOSABLE RESPIRATORS

R95/N99/N100/P100
The first and only NIOSH N95 approved one strap respirator.

Not manufactured with natural rubber latex.

No need for pre-stretching straps.

against laser plumes of surgical smoke.

Bacterial Filtration Efficiency (BFE)>99.9%.

Highest ASTM level of fluid resistance on the market (160mm Hg).

Available in 4 sizes for today’s diverse workforce.

Potential Healthcare Applications: Surgery, hospitals and healthcare facilities, nursing home care, convalescent facilities, police, fire and rescue teams, EMS/EMT, homeless shelters, occupational health facilities, school healthcare offices. Moldex designed the 7000 and 7800 half masks and 9000 full face series to be the most user friendly respirators on the market. These streamlined respirators feature fewer parts, minimal maintenance, and a wider field of vision. They are all ultra-light weight, durable, and economical, so maximum comfort with extended use is built-in. The award-winning 7000/7800/9000 series add up to simple, comfortable, and economical respiratory protection that’s just plain EASY TO WEAR.

7000/7800 FEATURES

7800 PREMIUM SILICONE HALF MASK

The 7800 Premium Silicone Half Mask has higher resistance to heat and compression, with all the enhanced comfort and durability of silicone.

Full range of gas/vapor cartridges for these common applications and environments: foundries, paper, paint/ coatings, aerosol products, printing, pharmaceuticals, agriculture, tobacco, mining, petrochemical, aluminum processing, textiles, glass, chemical manufacturing, coal, utilities, cement, fiberglass, sand, coal, cotton, rubber, textile, printing, woodworking, woodworking, photography, food processing, welding, mining, transportation, ship/boat building, health services, primary and fabricated metal.

Common applications and environments for 7940 P100 filter and 7990 P100 cartridge:  for contaminants where an OSHA substance specific standard applies (asbestos, lead, cadmium, inorganic arsenic, MDA) requiring a HEPA filter as well as pharmaceutical, battery, nuclear, welding, metal processing. Also for use in environments where oil-based particulates are present.

Common applications and environments for N95 and R95:  Welding, grinding, machining, bagging, buffing, cutting, metalworking, daily environments, housekeeping, poultry, sanding, wood, furniture, livestock, waste processing.
