

# HEARING AND RESPIRATORY PROTECTION FOR THE CONSTRUCTION INDUSTRY

Moldex has effective solutions to increase comfort, durability and convenience. We strive to deliver products that increase compliance while decreasing overall costs.

Data from the BTMed Screening Program show that among construction workers examined between 1996 and 2010, 58% had significant abnormal hearing loss due to noise exposures at work.\*

OSHA requires hearing protection above 85 Decibels (29 CFR 1910.95)

## HEARING PROTECTION

Innovative designs such as the multi-curved stem and the easy grip handle of Glide Twist-In earplugs make them perfect for dirty work environments and when wearing gloves. Plus, the Glide Foam Twist-In has the highest NRR available in a no-roll earplug on the market.

PlugStation earplug dispensers can be hung just about anywhere to provide convenient access to hearing protection. Easy, convenient access means higher compliance, and because workers take just one pair at a time, cost savings will increase also. Available filled with uncorded and corded earplugs.

**Convenience, Compliance, and Cost Savings.**

## COMFORT THAT LEADS TO COMPLIANCE

All Moldex disposable masks are designed to contour the face without pressure points with a pinch-free nose bridge and with Softspun® lining for increased comfort.

AirWave respirators feature a patented wave design for more airflow in and out for cool comfort and easier breathing. Plus, the exclusive Flexi-Fit design provides added comfort. Easier breathing and more comfort leads to higher compliance.

**More Air. More Wear.**

## STOP UNNECESSARY WASTE

All Moldex disposable masks feature the exclusive Dura-Mesh® shell that resists collapsing in hot, humid environments so they last longer, helping prevent premature disposal.

HandyStrap® and SmartStrap® masks hang comfortably around the neck when not in use, preventing premature disposal for significant cost savings.

**Longer Lasting = Fewer Masks Used = Increased Cost Savings**

## EASY TO WEAR

Reusable 7000 and silicone 7800 half masks feature ultra-light weight, an extra wide sealing area, and fewer parts for minimal maintenance. Plus the 7000 Series also comes preassembled for compliance out of the bag.

**Long lasting comfort and easy to wear.**
