

MOLDEX

BATTLEPLUGS®

Highest Performing Spatial Awareness Rating Of All Earplugs Tested

In testing conducted by the Department of Defense Hearing Center of Excellence, BattlePlugs wearers accurately located the origin of a detected sound in 3 seconds. This was the **least amount of time needed of any earplug tested.**

Which one would you prefer when locating sound is critical?

<https://hearing.health.mil/-/media/Images/HCE/Materials/Posters/Passive-Device-Poster.ashx>

Spatial Awareness measurements were collected to demonstrate the impact of hearing protection devices on the amount of time that is required to accurately locate the origin of a detected sound in any direction (can I hear the sound and determine the direction of the sound?).

Did You Know?

- Authorized hearing protector for use by Soldiers and Department of the Army Civilians
- Dual Mode Protection – Open cap to hear commands while maintaining impulse noise protection – Close cap for continuous/steady noise and impulse noise protection
- The louder the blast, the more noise reduction (in open position)
- Cap is easy to open and close even with gloves on, in-ear
- Easy to see when cap is in open or closed mode
- Easy to clean

Ready To Protect In Different Noise Environments

Having both impulse and passive earplugs at the ready, in a secure durable case, allows you to be better protected when your noise environment changes. Wear the passive earplugs at the shooting range and switch to

BATTLEPLUGS®

the BattlePlugs in the field, where situational awareness is critical. Wear the BattlePlugs when you will need to hear commands and switch to the passive earplugs when in a loud transporter.
