We've made a pledge of our own:

Over 150 major corporations have taken a stand against the use of PVC plastic in their products and/or packaging. Companies like Apple, SC Johnson, Wal-Mart, Toyota, Hewlett-Packard, and Nike have acknowledged the problems of polyvinyl chloride (PVC) and have developed PVC phase-out policies to reduce or eliminate this material.

PVC-Free is good for your business.

An increasing number of companies are implementing environmentally preferred purchasing programs and this creates tremendous challenges. And tremendous opportunities.

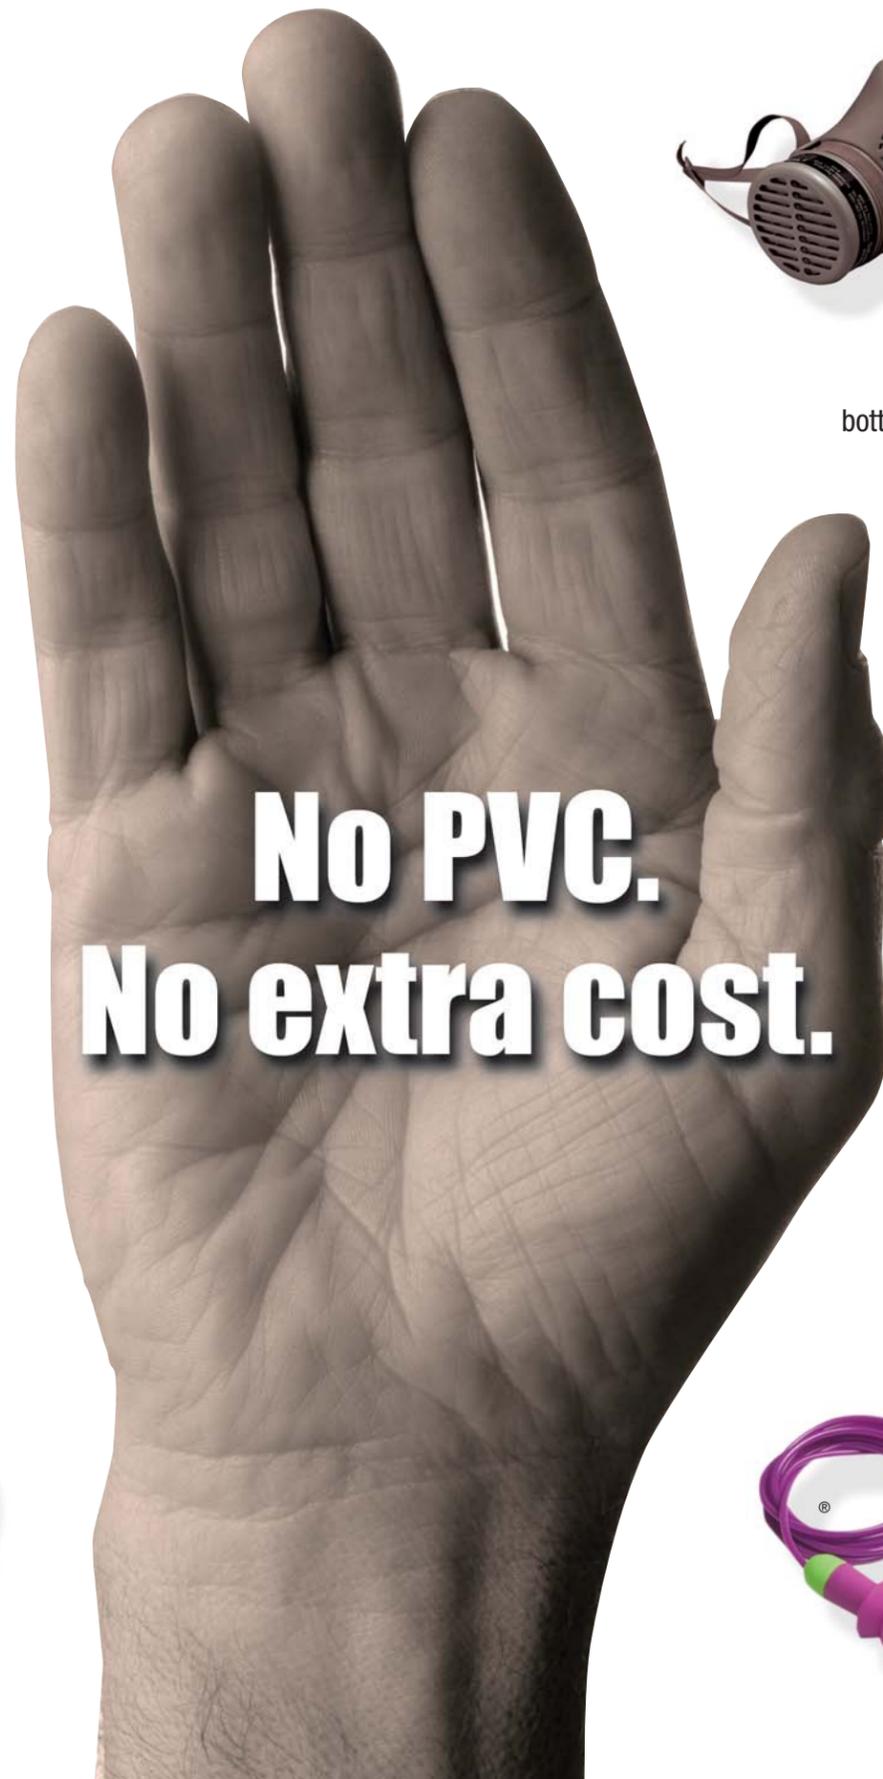

These market leaders recognize PVC-Free as a benefit. Yet, environmentally sensitive products often come at a premium price and sacrifice performance. Until now.

Moldex is meeting these challenges and opportunities head-on by offering the first and only line of hearing and respiratory protection products that are completely PVC-Free. Most Moldex products have always been PVC-Free and now all Moldex products and packaging are PVC-Free.

All with absolutely no compromise in quality and at no extra cost. **So you can upgrade to PVC-Free for free.**

**No PVC.
No extra cost.**

PVC-Free makes Sense.

Approximately 7 billion pounds of PVC products end up in the trash annually. Toxic chemicals associated with PVC disposal in landfills and incinerators have been linked to a wide range of health hazards.

One PVC-bottle can render 100,000 recyclable bottles unusable. Often PVC is not listed in products and packaging, which can lead to contaminating other recyclables.

Major corporations are adopting business practices that are not only a competitive advantage, but also provide a win-win situation for their customers and future generations.

Upgrade your customers to PVC-Free. For Free.

Moldex is a recognized leader and innovator in the field of personal protective equipment. Every Moldex product is 100% PVC-Free at no extra cost.

And that's an idea that makes sense and is good for business. PVC-Free and Moldex, "Ideas that wear well.™"
